

New!

CoaguChek[®] XS system

Our new CoaguChek XS system uses smart technology to help ensure accurate results with a finger-stick instead of a venous draw.

The finger-stick may be a less painful manner of testing for eligible patients monitored for warfarin (*coumadin blood thinner*) therapy.

Farah Erickson MT (ASCP)

CoaguChek technology offers:

- ♥ A finger-stick instead of a venipuncture
- ♥ Reduced discomfort
- ♥ Requires only one drop of blood
- ♥ Results available in 1 minute

Technology and compassion coming together to deliver the best in patient satisfaction. We care about you!

The CoaguChek XS system was purchased with a grant from the Smoky Valley Community Foundation and a gift from a private donor.
